

MIT SLOAN

INSIDER TIPS

ABOUT MIT

MIT Sloan business school has a very different feel from its neighbor across the Charles River - the Cambridge campus is more urban and industrial, with an informal mish-mash of architectural styles and a few green spaces. The MIT Sloan School of Management, unlike Harvard, does not have its own library, but rather shares it with the university. So there are more opportunities for MIT Sloan students to mix with the classes from the rest of MIT.

Several well-known financial and managerial theories were developed through MIT Sloan. For those wondering, "What is MIT Sloan known for?", there is a strong analytical and data-driven focus here, especially in the core classes, and this is combined with an emphasis on innovation. Students only take one semester of MIT Sloan MBA core classes, so there is a lot of flexibility to focus on electives. The MIT Sloan MBA class profile is composed of a smaller student body, which means that the collaborative and energetic culture of innovation counts for a lot. MIT Sloan is a place where ideas matter.

STRENGTHS AND SPECIALIZATIONS

The MIT Sloan MBA is known for its emphasis on innovation, technology, and entrepreneurship. The school is also very strong in production/operations and information systems.

TOP TIPS FOR ACING YOUR SLOAN APPLICATION

BY PATRICIA ROBERTSON

During several years at MIT, Patty worked in admissions for MIT Sloan and its Leader for Global Operations program. She has coached executives, recruited global MBA students, and partnered with MBA programs around the world to deliver executive development for all career stages.

Sloan is a seriously mission-driven institution, looking for similarly minded individuals who will ultimately live out their mission.

1

STEM & GMAT REIGN SUPREME

MIT Sloan very openly favors applicants with very strong quantitative foundations and has a history of attracting (and admitting) students with science, technology, engineering and mathematics profiles – as well as those who have a record of achievement in economics. If you do not have this kind of academic background, you need to make sure your quant score on the GMAT is very strong. If you undertake quantitative work in your current or a past role, you might also speak to your letter of recommendation writers about highlighting this skillset.

ACTIONS SPEAK LOUDEST

2

MIT Sloan pioneered action-learning – the Institute’s motto of *mens et manus* (Latin for “mind and hand”) is a philosophy of creativity and intelligence coupled always with action. Show us how you execute your ideas. Are you someone who can help advance ideas and work collaboratively to benefit others and the world? Share examples of how you have taken action that improved a process, an organization, or even a group or person.

Be specific and concrete – what did you do and learn?

3

IMPACT MATTERS

Making a positive impact matters. What do you plan to do with your degree that will positively impact the world? As a seriously mission-driven institution, Sloan is looking for people with great ideas who have the motivation and passion to take those ideas into action – thus “ideas made to matter”. Past experience is a great predictor of future success so show us (don’t tell us) about your dreams, what motivates you, and how you have brought others along in the process.

SHOW US YOUR HEART

4

There are lots of smart, motivated, and accomplished people – just like you! What makes you different? It is our heart that motivates us in life and drives us to work hard and overcome obstacles. Share what motivates you. Who you are as a person? How do you show up on a team, in your family, or in the world? What unique characteristics or circumstances have contributed to your success so far? This is our best predictor that you will be a great collaborator in bringing your creativity, intelligence, and determination to address the great problems of the world.

5

THINK BEYOND THE SCHOOL OF MANAGEMENT

Because of its emphasis on innovation, many of Sloan's alumni have made strides in terms of being entrepreneurs, particularly in the field of technology. If you have entrepreneurial ambitions, including how you plan to leverage the technical expertise of the larger MIT community, this will make you a more attractive applicant. But please, avoid rehashing what MIT already knows about themselves or regurgitating information about the program from off their website.

Don't forget, when it comes to attracting top talent Sloan goes head to head with Stanford and Haas from the west coast, and HBS just across the Charles River. If appropriate, articulate how the interaction with some of the world's brightest engineers and scientists, and an extraordinary ecosystem for startups matches with your MBA goals.
