PROFESSIONAL EXPERIENCE

WIPRO LIMITED, Kolkata, India

***Team Leader**, Medical Device Services* *Jan 2023 – Present*

Complaint-management program for a leading global medical-device manufacturer: 1M+ complaints a year, multi-million-dollar revenue

- Led the recovery of an underperforming business unit with 33 frontline employees across Cebu and Kolkata, addressing repeated client escalations by rebuilding senior-client relationships, introducing dashboards where none existed, resetting operating standards, strengthening team leadership, and setting up a regular review cadence with clear accountability
- As a result, restored 3 previously failing KPIs to green for 12 consecutive weeks, cut average handling time 40% to 9 minutes and reduced the average complaint-logging time to 0.7 days against a 2-day requirement. Client escalations ceased. Selected for a client-requested 3-week international assignment in Cebu, Philippines, the first for a Team Leader on the project
- Led 27 analysts (direct reports) as first Team Leader of a new Quality function independent of Operations, setting up a weekly audit of 250 randomly selected closed complaints in each of 10 business units (2,500 in all) against 44 quality parameters
- Built a recurring quality report checking every closed complaint (not just the audit sample) for missing, contradictory or miscoded data, broken down by business unit and individual, enabling targeted coaching. Weekly defects fell from 11,222 to 1,320 (down 88%) in 11 weeks. Separately partnered with the automation team to automate report preparation, saving ~5 hours of manual work a week
- At the Associate VP's request, took ownership of the Investigation Summary, the parameter with the most defects: categorized errors and paired targeted coaching with a 4-hour video library that replaced repeated live sessions. Quality score rose from 83% to 94%, with zero audit findings in this area to date
- Helped develop a text-analytics tool that flags potentially reportable complaints for closer review; built its ~1,500-keyword taxonomy and embedded the screening in daily complaint allocation
- Redesigned the 18-day new-hire curriculum with regular knowledge checks, shadowing of experienced colleagues, hands-on practice on simulated cases of increasing difficulty, and a final live assessment where trainees process a case and explain each step; 350 trainees have completed the program since April 2025
- Selected to host the department's only fireside chat with the global business head (~150 attendees), featured in the quarterly newsletter

***Senior Associate**, Medical Device Services* *Oct 2021 – Jan 2023*

- Built and streamlined complaint allocation to prioritize potentially reportable and aging cases and reduce late reporting
- Analyzed ~5,000 complaints across 700+ evaluators and produced daily reports on productivity and complaint aging trends

***Associate**, Clinical Data Management and Trial Master File (TMF) Services, global pharmaceutical client* *Oct 2020 – Oct 2021*

- Led onboarding and early-stage performance management for 129 remote hires across multiple cohorts, cutting onboarding time from ~6 weeks to 3 and retaining over 90% through the early-stage period. Productivity for new-hire cohorts averaged ~170 documents a day, ~40% above the daily average for tenured staff
- Acted as informal team lead and go-to expert for 70+ colleagues at peak, beyond the formal scope of the role
- Served as operations liaison to technical teams, troubleshooting an unstable work-allocation platform

BIOMARIN, Novato, California — ***Quality Control Technician*** *Apr 2020 – May 2020*

- Supported cGMP microbiological and analytical testing, calibration, reagent preparation, sample accessioning and LabWare LIMS tasks

GENENTECH, Vacaville, California — ***Bioprocess Manufacturing Technician*** *Jul 2019 – Apr 2020*

- Worked in upstream pharmaceutical manufacturing operations in a cGMP environment; took ownership of the media-preparation area within 6 months, becoming one of the newest technicians trusted with full responsibility for the area
- Named Employee of the Month ~7 months into the role for reliability, learning speed and independent execution

Earlier internships (2016–2018): UC Davis Plant Sciences (lab research); Gold Standard Diagnostics (sales analytics, FDA-audit scribe); GSK Consumer Healthcare India (product research); Novartis (adverse-effect case review)

LEADERSHIP

PHI DELTA THETA, UNIVERSITY OF CALIFORNIA, DAVIS

***President** (Dec 2017 – Dec 2018)* | ***New Member Educator** (Dec 2018 – Dec 2019)* | ***Risk Management Chairman** (Dec 2016 – Dec 2017)*

- Elected president unanimously, the first international student to hold the role in the chapter's history; grew membership from ~30 to 62 through recruiting, prospect tracking, incentives and onboarding
- Established a dedicated Scholarship Chairman role with grade tracking, interventions, peer support and recognition; the chapter became the highest-GPA Greek organization on campus
- Launched the chapter's first campus-wide philanthropy event, raising over $2000 for the World Wildlife Fund

EDUCATION

UNIVERSITY OF CALIFORNIA, DAVIS — B.S. Biotechnology, Minor in Technology Management 2020

GRE: 325 (160V / 165Q)
