ARMAND HUBLER

ahubler.ieu2022@student.ie.edu | linkedin/armand_hubler | github/ahubler01
EU Citizen (CH, FR)

TECHNICAL SKILLS

Quantitative Modeling: Statistical Arbitrage, Time-Series Forecasting, Event-Driven Modeling, Walk-Forward Validation
Financial Domain: Market Microstructure, Market Making & Hedging, Risk Management (VaR/CVaR), Bloomberg Terminal
Programming & Data: Python, R, SQL, Git, PyTorch, Scikit-learn, Polars/Spark, MLflow
Cloud & AI: AWS, Azure, GCP, Agentic System Design, LLM Evaluation, RAG

PROFESSIONAL EXPERIENCES

SCALABLE CAPITAL *(Trading Broker)* **DE – Munich**
Quant Trading (Market Making) *Jun. 2026 – Aug. 2026*

- Analyzed quote competitiveness across **6,000+** equities, ETFs and ETPs (∼**€300M** daily volume), benchmarking the desk's quotes against competing venues using big data on AWS.
- Found that single-source hedging cost estimates understated true costs; on my own initiative, built a per-venue pipeline measuring hedging costs, now used to recalibrate hedge routing.
- Delivered fast-turnaround PnL and execution analyses for traders, designing an agentic system to iterate faster on each new request, and reconciled every figure across sources before delivery.

SUCDEN *(Commodity Trading)* **FR – Paris**
Quant Trading *Jun. 2025 – Dec. 2025*

- Ran alpha research on ICE raw sugar futures, engineering features from **10+** years of prices and supply-demand fundamentals, with every input aligned to its publication date to avoid look-ahead bias.
- Trained walk-forward ensembles (Random Forest, XGBoost) on triple-barrier labels with costs in every backtest; **75%** out-of-sample directional accuracy on filtered signals.
- Stress-tested signals across market regimes before trusting them; sized with quarter-Kelly on calibrated probabilities and gave traders per-signal feature attribution.

AXA INVESTMENT MANAGER *(Asset Manager)* **FR – Paris**
Back End Intern – Alts *Jun. 2024 – Aug. 2024*

- Developed RAG-based GenAI tooling for ESG credit analysts within a **10**-person AXAIM/Capgemini team, using Python, Azure, OpenAI, Mistral, and LangChain.
- Built an LLM-as-a-judge evaluation pipeline (DeepEval) to extract KPIs from **600+**-page ESG reports in under **1** minute with **85%+** extraction accuracy, and prepared fine-tuning datasets to improve model relevance.

PROJECTS

HACKEUROPE HACKATHON *(Susquehanna)* Feb. 2026

- Built an ML-based scheduler forecasting regional supply-demand to route AI training jobs to green and cheap spot instances.

C1 SPRING TERMINAL *(Citadel & Citadel Securities)* Apr. 2025

- Top **10** out of **42** selected global participants; engineered real-time decision-making bots in a tower-defense trading simulation.

CORNELL DIGITAL AGRICULTURE HACKATHON *(AgTech)* Mar. 2025

- Finalist among **150+** participants; built a crop insight platform integrating satellite and weather data to deliver WhatsApp-based farmer analytics.

NTT DATA HACKATHON *(Consulting)* Feb. 2025

- **1st** place; created an ensemble forecasting model to predict production across **300+** renewable plants.

RYANAIR HACKATHON *(Airline)* Mar. 2024

- **2nd** place; developed an ensemble model with asymmetric loss for food provisioning prediction using supply and demand data.

EDUCATION

IE UNIVERSITY **ES – Madrid**
Dual Degree in Business Administration + Data and Business Analytics Sep. 2022 – May. 2027 (Expected)

- GPA: **8.52** ; Honors: Linear Algebra, Natural Language Processing (NLP), Business Analytics and Tech Lab

LYCÉE SAINT-JOSEPH DU LOQUIDY **FR – Nantes**
French Baccalaureate with Highest Honors Sep. 2021 – Jul. 2022

- **20**/**20** Mathematics ; **17**/**20** Economics and Social Sciences

LANGUAGES

French (native) • **English** (fluent) • **Spanish** (beginner) • **German** (beginner)

ADDITIONAL EXPERIENCES

- Built a content creation brand at age 13, collaborating with hotels, music festivals, tourism boards, and athletes.
- Marathon finisher (**3:35h**) ; Half Marathon (**1h39**).
